

# *Measure, Integration & Real Analysis*

---

preliminary edition  
19 March 2018

Sheldon Axler

# Contents

<i>Preface for Instructors</i>	<b>xi</b>
<i>Preface for Students</i>	<b>xv</b>
<i>Acknowledgments</i>	<b>xvi</b>
<b>1 Riemann Integration</b>	<b>1</b>
1A Review: Riemann Integral	<b>2</b>
Exercises 1A	<b>7</b>
1B Why the Riemann Integral is Not Good Enough	<b>9</b>
Exercises 1B	<b>12</b>
<b>2 Measures</b>	<b>13</b>
2A Outer Measure on $\mathbf{R}$	<b>14</b>
Motivation and Definition of Outer Measure	<b>14</b>
Good Properties of Outer Measure	<b>15</b>
Outer Measure of a Closed Bounded Interval	<b>18</b>
Outer Measure is Not Additive	<b>21</b>
Exercises 2A	<b>23</b>
2B Measurable Spaces and Functions	<b>25</b>
$\sigma$ -Algebras	<b>26</b>
Borel Subsets of $\mathbf{R}$	<b>28</b>
Inverse Images	<b>29</b>
Measurable Functions	<b>31</b>
Exercises 2B	<b>38</b>
2C Measures and Their Properties	<b>41</b>
Definition and Examples of Measures	<b>41</b>
Properties of Measures	<b>42</b>
Exercises 2C	<b>45</b>

2D	Lebesgue Measure	47
	Additivity of outer measure on Borel sets	47
	Lebesgue Measurable Sets	52
	Cantor Set	55
	Exercises 2D	58
2E	Functions on Measure Spaces	60
	Pointwise and Uniform Convergence	60
	Egorov's Theorem	61
	Simple Functions	62
	Luzin's Theorem	64
	Lebesgue Measurable Functions	67
	Exercises 2E	69
<b>3</b>	<b>Integration</b>	<b>71</b>
3A	Integration with Respect to a Measure	72
	Integration of Nonnegative Functions	72
	Monotone Convergence Theorem	78
	Integration of Real-Valued Functions	80
	Exercises 3A	83
3B	Limits of Integrals & Integrals of Limits	85
	Bounded Convergence Theorem	85
	Sets of Measure 0 in Integration Theorems	86
	Dominated Convergence Theorem	87
	Riemann Integrals and Lebesgue Integrals	90
	Approximation by Nice Functions	91
	Exercises 3B	95
<b>4</b>	<b>Differentiation</b>	<b>97</b>
4A	The Hardy–Littlewood Maximal Function	98
	Markov's Inequality	98
	Vitali Covering Lemma	99
	Hardy–Littlewood Maximal Inequality	100
	Exercises 4A	102
4B	Derivatives of Integrals	104
	Lebesgue Differentiation Theorem	104
	Derivatives	106
	Density	109
	Exercises 4B	112

<b>5</b>	<b><i>Product Measures</i></b>	<b>113</b>
5A	Products of Measure Spaces	114
	Products of $\sigma$ -Algebras	114
	Monotone Class Theorem	116
	Products of Measures	117
	Lebesgue Measure on $\mathbb{R}^n$	119
	Exercises 5A	119
5B	Iterated Integrals	120
	Tonelli's Theorem	120
	Fubini's Theorem	120
	Lebesgue Integration on $\mathbb{R}^n$	120
	Exercises 5B	121
<b>6</b>	<b><i><math>L^p</math> Spaces</i></b>	<b>123</b>
	Exercises 6	124
<b>7</b>	<b><i>Hilbert Spaces</i></b>	<b>125</b>
	Exercises 7	126
<b>8</b>	<b><i>Convolutions and Fourier Transforms</i></b>	<b>127</b>
	Exercises 8	128
<b>9</b>	<b><i>Signed and Complex Measures</i></b>	<b>129</b>
9A	Dual of $C(K)$	130
9B	The Cantor Function	131
	Exercises 9B	131
9C	Absolute Continuity	135
	Integrals of Derivatives	135
	Radon–Nikodym Theorem	135
9D	Lebesgue–Stieltjes Integration	136
	Exercises 9D	137
<b>10</b>	<b><i>Probability Measures</i></b>	<b>139</b>
	Exercises 10	140

<b>0 Appendix: <i>The Real Numbers</i></b>	<b>141</b>
A Complete Ordered Fields	<b>142</b>
Fields	<b>142</b>
Ordered Fields	<b>143</b>
Completeness	<b>147</b>
Exercises A	<b>150</b>
B Construction of the Real Numbers: Dedekind Cuts	<b>152</b>
Exercises B	<b>156</b>
C Sup and Inf	<b>157</b>
Archimedean Property	<b>157</b>
Supremum and Infimum	<b>158</b>
Irrational Numbers	<b>160</b>
Intervals	<b>161</b>
Exercises C	<b>162</b>
D Open and Closed Subsets of $\mathbf{R}$	<b>165</b>
Limits	<b>165</b>
Open Subsets	<b>166</b>
Closed Subsets	<b>169</b>
Exercises D	<b>171</b>
E Sequences and Continuity	<b>174</b>
Bolzano–Weierstrass Theorem	<b>174</b>
Continuity and Uniform Continuity	<b>177</b>
Max and Min on Closed Bounded Sets	<b>179</b>
Exercises E	<b>180</b>
