

# Index

- absolute value, 145, 278
- absolutely continuous, 255
- additivity of outer measure, 47–48, 50, 59
- a.e., 88
- Agnesi, Maria Gaetana, 71
- algebra, 118
- almost every, 88
- Apollonius's Identity, 208
- approximation of Borel set, 48, 52
- approximation of function
  - by continuous functions, 96
  - by dilations, 98
  - by simple functions, 94
  - by step functions, 95
  - by translations, 98
- Archimedean Property, 290
- Archimedes, 274
- area paradox, 24
- area under graph, 132
- Axiom of Choice, 22–23, 170, 177, 220
  
- bad Borel set, 111
- Banach space, 155
- Banach, Stefan, 144
- basis, 168
- Bengal, xiii, 44
- Bergman space, 238
- Bessel's Inequality, 226
- Bessel, Friedrich, 227
- Bolzano, Bernard, 310
- Bolzano–Weierstrass Theorem, 310
- Borel measurable function, 33
- Borel set, 28, 36, 135, 237
- Borel, Émile, 19
- bounded, 134
  - function, 308
  - linear functional, 167
  - linear map, 160
  - set, 308
- Bounded Convergence Theorem, 87
- Bunyakovsky, Viktor, 204
  
- Cantor set, 55–59, 263
- Cauchy sequence, 154
- Cauchy, Augustin-Louis, 155
- Cauchy–Schwarz Inequality, 203
- chain, 170
- characteristic function, 31
- Chebyshev's Inequality, 104
- Chebyshev, Pafnuty, 104
- Clarkson's Inequalities, 194
- Clarkson, James, 194
- closed, 134
  - ball, 157
  - half-space, 220
  - set, 157, 303
- closure, 158
- complement, 303
- complete ordered field, 282
- complex conjugate, 148
- complex inner product space, 197
- complex measure, 241
- complex number, 145
- conjugate symmetry, 197
- continuous
  - function, 159, 311
  - linear map, 162
- convex set, 210
- countable, 302
- countable additivity, 25
- countable subadditivity, 17, 43
- countably additive, 241
- Courant, Richard, 196
- cross section
  - of function, 117
  - of rectangle, 116

- of set, 116
- De Morgan's Laws, 304
- De Morgan, Augustus, 304
- decreasing sequence, 308
- Dedekind cuts, 285
  - positive, 287
  - product of, 289
  - sum of, 286
- Dedekind, Richard, 196, 285
- density, 110
- derivative, 108
- differentiable, 108
- dilation, 59, 138
- Dini's Theorem, 69
- Dirac measure, 82
- Dirichlet space, 239
- Dirichlet, Lejeune, 196
- distance
  - from point to set, 209
  - to closed convex set in Hilbert space, 211
  - to closed subspace of Banach space not attained, 210
- Dominated Convergence Theorem, 90
- double dual space, 177
- dual
  - double, 177
  - exponent, 181
  - of  $\ell^p$ , 192
  - of  $L^p(\mu)$ , 260
  - space, 174
- École Polytechnique Paris, 155
- Egorov's Theorem, 61
- Egorov, Dmitri, 61, 66
- Einstein, Albert, 178
- essential supremum, 179
- ETH Zürich, 178
- Euler, Leonard, 145
- family, 168
- Fatou's Lemma, 84
- field, 275
- finite measure, 121
- finite subadditivity, 17
- finite subcover, 18
- finite-dimensional, 168
- Fubini's Theorem, 130
- Fubini, Guido, 114
- Fundamental Theorem of Calculus, 108
- Gödel, Kurt, 173
- Gauss, Carl Friedrich, 196
- Gram, Jørgen, 232
- Gram–Schmidt process, 231
- graph, 133, 173
- greatest lower bound, 291
- Haar, Alfréd, 223
- Hahn Decomposition Theorem, 252
- Hahn, Hans, 173
- Hahn–Banach Theorem, 173, 220
- Hamel basis, 169
- Hardy, Godfrey H., 99
- Hardy–Littlewood maximal function, 102
- Hardy–Littlewood Maximal Inequality, 103
  - best constant, 105
- Heine, Eduard, 19
- Heine–Borel Theorem, 19
- Hilbert space, 209
- Hilbert, David, 196
- Hölder, Otto, 182
- Hölder's Inequality, 181
- Holmes, Sherlock, 280
- identity map, 216
- image, 313
- imaginary part, 145
- increasing sequence, 308
- increasing function, 34
- infimum, 292
- infinite sum in a normed vector space, 156
- infinite-dimensional, 168
- inner measure, 59
- inner product, 197
- inner product space, 197
- integral
  - iterated, 124
  - of characteristic function, 73
  - of complex-valued function, 146

- of linear combination of characteristic functions, 78
  - of nonnegative function, 72
  - of real-valued function, 79
  - of simple function, 74
  - on a subset, 86
  - on small sets, 88
  - with respect to counting measure, 74
- interior, 220
- intersection, 301
- interval, 295
- invariant subspace, 220
- inverse image, 29
- irrational number, 293
- Jordan Decomposition Theorem, 254
- Jordan, Camille, 254
- kernel, 166
- $\mathcal{L}^1$ -norm, 93
- least upper bound, 281
- Lebesgue Decomposition Theorem, 256
- Lebesgue Density Theorem, 111
- Lebesgue Differentiation Theorem, 106, 109, 110
- Lebesgue measurable function, 67
- Lebesgue measurable set, 52
- Lebesgue measure
  - on  $\mathbf{R}$ , 51, 55
  - on  $\mathbf{R}^n$ , 137
- Lebesgue space, 93, 179
- Lebesgue, Henri, 12, 85
- length of open interval, 14
- $\liminf$ , 84
- limit, 154, 299
- linear functional, 166
- linear map, 160
- linearly independent, 168
